

Company Profile

Efficient Workflow Solutions (EWS) was established in 2004 with the mandate to be the leading provider of business software for the moving industry. EWS is committed to maintaining its leadership position in the moving industry by investing more dollars into research and development than all of its competitors combined.

EWS is a subsidiary of Jonas Software, the leading provider of enterprise management software solutions to the Private and Semi-private Club, Foodservices, Construction, Metal Service Centers, Moving & Storage, Attractions & Leisure, and Fitness & Sports industries. Across these seven vertical markets, Jonas is the leading technology provider for over 10,000 customers across 15 countries.

EWS and Jonas are a part of the Constellation family of companies. Constellation companies are leading developers of technology solutions for vertical markets in North America, Europe and Australia. Constellation is publicly traded on the Toronto Stock Exchange under the symbol “CSU” and is currently Canada’s 3rd largest software company. In 2005, Constellation was the winner of the prestigious “Canada’s 50 Best Managed Companies.” Constellation group employees have the opportunity to move throughout the group, developing specialized skills and experience.

Position

The EWS Software Engineer develops revolutionizing next generation technologies for the moving and transportation industry. Whether it’s extending the enterprise system with APIs, automating build and deployment systems, or continuing to refine and scale complex business and accounting systems (just to name a few), you will be developing solutions to some of the most challenging technical problems in this space.

Our engineers work on many different projects with varying responsibilities. Below are some examples of the diverse projects with which you might be involved.

Job Responsibilities

- Write code for our web service applications, create robust production applications, and develop prototypes for quick technology evaluation.
- Build internal systems used by our EWS staff.
- Specialist domains: client application development for Windows, mobile applications, developer tools (build systems, UI components).

Job Qualifications

- BS, MS or PhD in Computer Science, or related technical discipline (or equivalent).
- Extensive programming experience in one or more of the following: C/C++, C#, Java (strong Object Oriented skills preferred).
- An outstanding foundation in computer science, with strong competencies in data structures, algorithms and software design.
- Coding skills in a scripting language, database design and SQL skills, and/or knowledge in RESTful web API design are a plus.
