## MSWhse January 2024 Fixes

In addition to numerous other bugs for which documentation is not needed, the following cases were resolved:

### Reports

**A CFW user would not be allowed access to reports even though permissions allowed the access.**

When a Customer has a CFW (Customer Facing Web) contact listed and that contact has full access to the Report by Location functionality, an error was returned when that user tried to access that report. The error read: 404 – Page Not Found. This has been fixed and is working properly.

### Warehouses

**Pallets currently in use were showing as not in use after billing was finalized.**

As an example, within Administration > Warehouses, Pallet P924 was supposed to be listing as still in use after the billing for the month was finalized. This was an error. After the fix, the pallet will correctly show "In Use" and not "Unassigned."

## Warehouses

**Pick Tickets****The font on Pick Tickets was too small.**

A bug caused the font on Pick Tickets to render exceptionally small, so it was hard to read.
