MSWhse July 2024 Features

This section lists the features added to MSWhse in this release.

Administration > Warehouses

SQFT and CUFT are new fields!

SQFT and CUFT can be added to specific locations. Notice in Figure 1 that AA001 has 24 SQFT per Position, which means the Left, Center and Right positions are each 24 SQFT.

MSWhse July 2024 Enhancements

This section lists the enhancements added to MSWhse in this release.

Transactions

Location Sheets now list Vault Locations.

In addition to the Vault Number, the Vault Location now also lists on Location Sheets. The Vault Number will list first (13) and then the Location (093C as shown in Figure 3).

MSWhse July 2024 Fixes

In addition to numerous other bugs for which documentation is not needed, the following cases were resolved:

Outbound Email Notifications

WRR has been removed from Outbound Transaction email notifications.

WRR Numbers are not used during an Outbound Transactions; therefore, "WRR No." has been removed from Outbound Email Notifications.

Transactions > Move Quantity > Another Warehouse

Empty Location Sheets were generated after a partial quantity was moved between warehouses.

The bug was noticed when only some of a quantity was moved between warehouses. When "Generate Location Sheet" was clicked when completing the move, the Location Sheet generated was completely blank. This has been corrected so that the correct quantity for that warehouse will list.

Of note, the warehouse for which the Location Sheet generates is the warehouse selected at the top of the Move Quantity screen, as shown in Figure 5.

The screenshot shows the 'Move Quantity' interface. At the top, there are filters for Warehouse (Creedmoor Moving), Customer (Belmont Academy), Location Type (Floor), and Location. A 'See Results' button and a 'CLEAR RESULTS' link are also present. Below the filters is a search bar and a table of items. The table has columns: Item No, PO No, Inventory No, Serial No, Vault, Pallet, Qty Available, UM, and Actions. The first row is 'Desk' with Qty Available 1. The second row is 'Board' with Qty Available 10. A 'MOVING TO' dialog box is open, showing 'Another Warehouse' checked. It has fields for Warehouse (Creedmoor Moving - Denver) and Receiving Date (07/31/2024). Below the dialog, there are fields for Qty (10), Move Qty (5), Vault, Pallet (DG27), Location Type (Floor), and Location (Receiving...). A 'Generate Location Sheet' button is visible with a green checkmark and a red 'x'.

Transactions > Move Quantity

Location Sheets were incorrectly including the prior location.

When moving items within the same warehouse, the generated location sheet was showing the current location but also the prior location. As an example, in Figure 6, the current location is 127 and the prior location was listing, which was 128. This bug has been fixed.
