MSWhse November 2024 Fixes

Vault History

Search field becomes disabled after performing a search.

Within Reports > Vault History, the Search field was not working properly. Once the Search field was used, the field became inactive. Fields that are inactive turn grey. Active fields are not, such as in the image below. This has been fixed and the Search field remains active.

The screenshot shows the 'Vault History Report' interface. At the top, there is a breadcrumb trail: 'Reports > Vault History Report'. Below this, there are two dropdown menus: 'Warehouse *' with 'Creedmoor Moving' selected, and 'Vault *' with '1x +277' selected. To the right of these is a blue 'See Results' button. Further right is a search field containing '100' with a magnifying glass icon. The search field is highlighted with an orange border.

INTERNAL REFERENCE: WD-4146

Transactions: Outbound

When using Kits, outbound quantities should not exceed available inbound quantities.

Before this fix, in certain scenarios, it was possible to enter outbound quantities that exceeded available inbound stock. The scenarios were limited to when a transaction was being edited, and several changes in requested quantities were entered within the same opened edit screen. This should never be possible and has been fixed.

INTERNAL REFERENCE: WD-4223, WD-4227

Reports

“Expected Quantity Report” was resulting in an error.

Creating an Expected Quantity Report was previously throwing this error: "500 Internal Server Error." This bug has been fixed.

INTERNAL REFERENCE: WD-4219

Transactions

Error message should not occur within “Add Items from Grid.”

The error message reads “The number must be between 0 and 24.” This message incorrectly appears as it is not applicable.

Add Items from Grid

2 Items

	Item No	Item Description	SKU	Qty
<input type="checkbox"/>	1	8' Wooden Shelf		26
<input checked="" type="checkbox"/>	2	Black Sofa		69

Location	Available	Quantity Request	
RA381C	16	<input type="text" value="16"/>	<div style="border: 1px solid #ccc; padding: 5px; display: inline-block;">34</div>
RA381L	24	<input type="text" value="18"/>	
UY231	29	<input type="text" value="0"/>	

The number must be between 0 and 24

INTERNAL REFERENCE: WD-4147

Transactions

Adding Item From Kit without choosing location results in errors.

When selecting items on the “Add Item from Kit” screen, if the pull location is not set before clicking “Select Kit,” errors in quantities and locations can occur. It is important to remember to click “Action” and set from where the quantity is to be pulled. Nonetheless, the process has been improved to make sure that this scenario cannot occur.

Add Items from Kit ✕
