

MoversSuite Version 2025.01

RELEASE DATE: January 6, 2025

Version 2025.01 Notices

NOTICE Commission Statement Access Issue

An access issue may occur when multiple people are attempting to work on the same statement. The issue arises when one user re-queries or finalizes a statement and a separate user attempts to access that same statement without refreshing the Commission Statement Management screen. In this scenario, the second user cannot view the statement. This issue was reported in testing in the 2024.26 release and is fixed in 2025.02.

REFERENCE NUMBER: MOV-5821

Version 2025.01 Summary

The following table contains the counts of the following items related to this release, as well as Year-to-Date totals.

NO CHANGES IN THIS RELEASE

#	Change Summary	YTD #
	New Product Feature	-
	Release Enhancement	-
	Release Fix	-
	Schema Change (tables affected)	-
	Admin Changes	-

Recent Changes

This section lists changes to the requirements that affect this specific version of MoversSuite.

NO CHANGES IN THIS RELEASE

Version 2025.01 Known Issues

The following issues are problems that may affect your decision to upgrade to this version of MoversSuite. The following issues are not resolved for this release.

QuickBooks Support for IE11 Deprecating for Authorization Screens (September 8, 2020)

Due to security requirements, starting Sept. 8, 2020, only Chromium-based embedded browsers will be supported for **QuickBooks Online Connection Authorization** screens and Internet Explorer 11-based embedded browsers will no longer work.

For authorization process in MoversSuite, the previous two versions of Google Chrome, Mozilla Firefox, Microsoft Edge, and Safari (11+) are supported. This is for the users who first turn the QuickBooks feature on. Or, in case, the feature is being used after a long while. Refer to [this blog](#) for further details on changes made.

Supported Windows Themes

Related to the scaling issue (listed below), MoversSuite recommends that if your client server is on Windows 10, that you avoid using themes developed for earlier versions of Windows. In other words, please load and use themes developed for the current version of Windows that you are on.

NOTE: The Aero theme works well with Windows Server 2008 R2. Reference the following video as a guide to installing the theme service and theme itself:

https://www.youtube.com/watch?v=Q_8VopNXVhE

Here is a link to additional information on Desktop Themes:

<https://support.microsoft.com/en-us/help/13768/desktop-themes-featured>

Screen scaling not available with MoversSuite

With the advances in screen size and resolution, many underlying applications are not able to deal with all the variations in configurations available to the variety of high definition (HD) screens, such as not being able to read field labels, etc. Due to this limitation, MoversSuite cannot scale as desired in all situations. **UPDATE:** With the release of MoversSuite 2018 R15, a solution has been implemented to address many of the issues involving scaling. (3705, 4114)

Until there is a better solution to scaling, EWS Group recommends that if you experience scaling problems with the MoversSuite application keep the size of your application to 100% and change the resolution as desired.

On Windows machines, you can verify and/or update the display settings as follows:

1. Right-click somewhere on your desktop and select **Display Settings**
2. Set the **Change the size of text, apps, and other items** to 100%.
3. Click on **Apply** to save the changes.
4. Click on **Advanced display settings**.
5. Make changes to the **Resolution** as needed.
6. Click on **Apply** to save the changes.
7. Close the screen by pressing the **X** in the upper right-hand corner of the screen.
